

Participants will

- Learn how to modify and adapt general education curriculum so students with ASD can access learning within the general education environment.
- Learn evidence-based teaching strategies that support students with ASD.
- Be able to observe a student and work collaboratively as a team to develop the supports needed across the day to allow students to independently access the curriculum and engage in socialization with others.
- Determine assessment tools appropriate to the student to support the team in planning needed supports.
- Develop staff trainings and provide direct consultation and/or coaching support to certified and noncertified staff.
